MacFarlane Pheasants, Inc.

MacFarlane Pheasants, Inc. is proud to be America's largest pheasant producer. Established in 1929, our farm has over 100 acres of flight pens with dense natural cover for our birds so that they will remain wild. We successfully delivered over **280,000** mature pheasants and **75,000** mature partridges nationwide during the 2009 season.

Chinese Ringneck • Melanistic Mutant • Manchurian Cross • French Redleg Partridge • Chukar/Redleg Partridge • Hungarian Partridge

"I have used MacFarlane pheasants for our driven pheasant shoots in Wyoming for over 20 years. The bird quality is superior and is extremely consistent. What I like is that I know exactly what I am getting and when I am getting them. The deliveries are within the time window of estimated arrival without fail. The birds are flight ready with good tails and do very well in the wild and are perfect for our early release program."

- **Paul Wallop**
Canyon Ranch, Big Horn, WY

MacFarlane Pheasants, Inc. breeds and hatches our own pheasants to produce a superior quality bird. Known for our wild pheasants, we select for long tails and appropriately colorful plumage. In 2010, we hatched over 1.5 million chicks. Because of our quality and standards, many other pheasant producers rely on us for their pheasant genetics.

MacFarlane Pen Crew

"I've been in the shooting preserve business since 1996 and used several sources for birds. MacFarlane's are far superior. They are not your typical shooting preserve bird, being one of the wildest birds we've ever had. I take my clients' opinions seriously, in polling them I have received the most positive feedback on MacFarlane's birds. Delivery process is A-1. Staff is absolutely wonderful. I took a visit to MacFarlane's facility and have found it to be a first class game farm, very clean and professionally operated."
